STRENGTHS

-  **Communication**
Being class representative for 2 years and working with the top notch team of different developers enhanced my communication skills.
-  **Leadership /Management**
Being a sports team captain and class representative in my university helped me acquire these qualities.

SUMMARY

Experienced Software engineer with 2+ years of expertise in tech industry, specializing in high-quality, scalable software applications and APIs. Proficient in multiple programming languages and modern web development frameworks like MERN stack and PHP/Laravel. Collaborates effectively with cross-functional teams to deliver innovative solutions and maintaining responsive design for web and mobile applications along with technical documentation.

EXPERIENCE

Software Engineer

Nextbridge Ltd

06/2022 - 02/2024 Lahore, Pakistan

<https://www.linkedin.com/company/nextbridge/>

- As a full-stack developer, I have had the pleasure of working on multiple projects as well as collaborating with the top notch team of developers specializing in React.Js, Node.Js, MonogoDB, Typescript, PHP, Laravel, MySql e.t.c. Together we worked on a mega project called "Dari"-Dari provides a one-stop solution for all real estate requirements in Abu Dhabi.

Web Developer

TatbeeqSoft

09/2021 - 06/2022 Lahore, Pakistan

- As a frontend web developer I had the pleasure of doing my first internship by working under senior developer's and worked on a project name Hafiz motors-an automotive website for cars using technologies like html,Css,JavaScript and PHP.
- I also worked as a MERN stack developer directly with the client in Kuwait to built his portfolio website name "ALAWAAL"for Aluminium Windows and Doors in MERN stack.

PROJECTS

DARI

05/2022 - 12/2023

<https://www.dari.ae/>

Dari is a one-stop solution for all real estate requirements in Abu Dhabi. This platform connects all real estate stakeholders and incorporates property sale, purchase, and lease, provides access to licensed real estate professionals and builds a real estate dashboard for public for the first time to help investors explore future investment opportunities. I have worked with the frontend team of this project by using technologies like html, css, react.js, Material UI and redux.

Nxb_Protfolio

11/2022 - 04/2023

Nxb.Portfolio is a portfolio generator website used by the developers to generate and showcase their portfolio to the clients by entering details like their skills, projects, tools, choose from the given available themes for their portfolio and download the pdf of their portfolio in the end. I have worked on both fronted and backend of this project using technologies like html, Css, jQuery, PHP/Laravel and MySql.

ALAWAAL

03/2022 - 05/2022

ALAWAAL is an portfolio website built for a client in Kuwait for displaying its hardware like Aluminium windows and doors. I have worked on both frontend and backend of this project using MERN stack.

EntWork

11/2021 - 04/2022

EntWork is and entertainment + work social media meme platform and place for freelancers and content creators to sell their services. I have worked on both frontend and backend of this project using html, Css, react.Js while the backend was in Node.Js and MongoDB.

Hafiz Motors

10/2021 - 01/2022

Hafiz motors is an automotive website specifically designed for a client to display its collection of cars and their detailed information for its customers. I have worked on the frontend side of this project using html, Css, JavaScript and PHP.
